Trucks you can trust

The Atego 4x2 Range.

With the Atego you are ideally prepared for the challenges of medium-duty distribution haulage, thanks to its high level of economic efficiency and reliability. Because of its versatility, the Atego offers an application specific vehicle configuration for practically every requirement and every sector.

Reliability. The Atego is a truck that bears out the “Trucks you can trust” claim in daily use, for example with application-specific and durable technology, not to mention more than 120 years of experience in vehicle manufacturing.

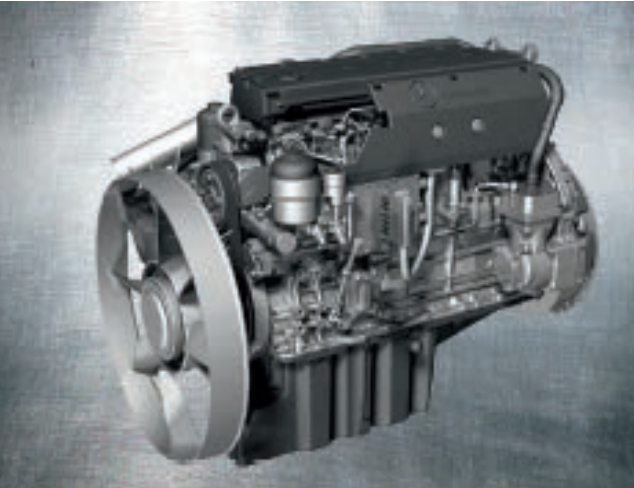

Economy. Efficient 4 and 6-cylinder engines with high performance and low consumption. With the PowerShift 3 automated gearshift, driving is made easier, even in tough conditions.

The dashboard of the Atego supports economical driving by featuring a real time indicator for fuel consumption as well as an Econometer, which indicates the most appropriate engine speed in every situation of operation.

Safety. The Atego is equipped with an ABS brake system and the powerful engine brake “Top Brake”. The ABS system ensures vehicle maneuverability even in emergency braking situations. The engine brake “Top Brake” feature improves braking performance, reduces brake wear and thus increases efficiency.

The dashboard provides the driver with all vital information for the vehicle operation. The on-board diagnosis informs about occasional irregularities of the vehicle and helps the driver in planning the required preventive maintenance.

Security is even ensured when the driver is outside the vehicle, as the key with immobilizer minimizes the risk against thefts.

Engine. Powerful, reliable, economical – the Atego's Euro V engines boast low fuel consumption, tractive power and very smooth running. The 4-cylinder inline engines deliver up to 136 kW (182 hp) and peak torque of up to 700 Nm. The 6-cylinder inline engines deliver up to 188 kW (252 hp) and peak torque of up to 900 Nm.

Mercedes PowerShift 3. Simple handling and low fuel consumption: the automated transmission ensures precise gear selection, short shift times, high driving confort and optimal economy. Various driving programmes provide a convincinv shifting strategy

appropriate to the driving situations and load carried at the time. Ecoroll and Power modes can get the most of the powertrain for either a lowest possible fuel consumption or in situations where more power is required. Mercedes PowerShift protects the powertrain, significantly reducing maintenance and operating costs and thus contributing to the profitability of your business.

Versatility. The Atego is a particularly versatile truck that makes easy work of distribution haulage with equipment designed for your specific operations.

To enable the Atego to be tailored as closely as possible to its field of work, it is available in four different cabs and several options of wheel base.

Our Custom Tailored Trucks department can also implement many different and complex customizations enabling the Atego to perfectly fit your business before leaving our factory.
